

# LOVE IN ACTION: HONORING THE GIFT OF SIGHT

*On National Donor Day, we honor love in action—the choice to give sight and change lives.*

Every year on February 14, National Donor Day is observed across the country to honor the selfless individuals who give the gift of life and sight through donation. For Saving Sight, this day is a powerful reminder of how one generous decision can transform lives through the gift of sight.

Through cornea donation, donors make sight-restoring transplants possible for people living with corneal blindness and vision loss. One decision can restore vision for multiple individuals, giving recipients the ability to work, learn, drive, recognize loved ones, and experience the world again with clarity and

independence. For donor families, that gift becomes a lasting legacy, proof that even in loss, life and light can continue.

National Donor Day is more than a date on the calendar. It is a moment to honor donors, recognize the courage and compassion of donor families, and celebrate the lives changed because someone chose to give. It is also a reminder that the need for donation is constant and the impact is profound.

At Saving Sight, we are privileged to steward these gifts with dignity, care, and gratitude, ensuring that every donation creates the greatest possible impact.

This National Donor Day, you can help restore sight and change lives:

- ▶ Register as an organ, eye, and tissue donor
- ▶ Share your decision with your family and loved ones
- ▶ Help spread awareness by encouraging others to learn about donation

Your choice has the power to create a future filled with vision, hope, and healing.
